about me.

After working with sound for 6 years, and running my own business for 2, I wanted a new challenge that would allow me to work creatively and see something built over the course of each project.

In July 2017 I left my job as a sound engineer and began studying full time at Makers Academy, a developer bootcamp in London, where I trained to become a full stack developer.

I have been working as either a full stack or backend engineer since

MY Experience.

October 2017 to October 2019
February 2020 to present

Triptease
www.triptease.com
Software Engineer

TRIPT EASE

Triptease is a startup in the hospitality industry. Their goal is to help hotels increase direct bookings with data insights, targeted messaging, automated live chat and personalisation tailored for hotels.

My role involves developing and building the front end platform as well as backend services. The product is built on a predominantly javascript techstack, using Typescript, Node.js, React, MongoDB (although now moving towards postgres), and Docker.

My current team is focused on streamlining integrations with a goal to allowing clients to self-serve signup to the platform.

October 2019 to February 2020
Compare The Market
www.comparethemarket.com
Backend Engineer

At Compare the Market I was part of the 'Lego' backend team who were a team of 4 maintaining a variety of backend Node.JS services relied on by other parts of the business

July 2017 to September 2017

Makers Academy
www.makersacademy.com
Student

MAKERS ACADEMY

Makers Academy is a 12-week full-time coding bootcamp with a 10% course acceptance rate.

During the course we were taught Agile and XP values. We learnt to develop a project from an MVP and incrementally add features. We were encouraged to run our own standups and retros, and to carefully plan our code before we began a project by domain mapping and creating user stories. We also learnt the importance of test driven development, and object oriented programming.

September 2013 to December 2015

Draughts
www.draughtslondon.com
Co-Founder

I co-founded London's first board game café, gaining a huge amount of media attention, including from The Guardian, Time Out, The Metro and London Live.

my skills.

I have developed code with the following technologies and frameworks:

Languages

- Typescript
- Javascript
- Golang
- Ruby
- (HTML and CSS)

Frameworks

- React
- Node.js
- Jest
- Enzyme
- Mocha/Chai
- Ruby on Rails
- RSpec

MY EDUCATION.

July 2017 to September 2017

Coding Bootcamp
Makers Academy

2010 to 2011

MA in Sonic Art (Merit)
University of Sheffield

2006 to 2010

BA in Music (2.1)
University of Sheffield

my hobbies & interests
