💼 EMPLOYMENT HISTORY

Senior Software Engineering Consultant at Red Badger, London
May 2023 — Present

Working with a cross functional team and build a bespoke in-house web application for a third party client.

[Typescript, React]

Software Engineer at Coinbase, London
May 2022 — February 2023

Developed and launched an open banking payment feature for Coinbase UK users. Collaborated in a multidisciplinary team to launch an innovative payment solution utilising Open Banking.

[Go, Ruby]

Full stack Engineer at Cazoo, London
January 2021 — May 2022

My role involved working in a multidisciplinary team to develop and deploy new services and products - specifically 'Cazoo Purchase', a new tool for purchasing customers cars to grow our inventory.

[Typescript, Node.js, React, AWS Lambda]

Full stack Engineer at Trint, London
June 2020 — January 2021

My role involved working with a multidisciplinary team to create new features for the platform to open up new revenue streams for the company.

[Typescript, Node.js, React, MongoDb, Docker]

Software Engineer at Triptease, London
October 2017 — May 2020

My role involved developing and building the front end platform as well as back end services. The product is built on a predominantly javascript tech stack. I also worked on streamlining integrations with a goal to allowing clients to self-serve signup to the platform.

[Typescript, Node.js, React, MongoDb, Docker, GCP]
